OBJECTIVE

Obtain various internship opportunities during college to build upon self-attained skills and contribute impactful work towards the pursuit of a tech company.

EDUCATION

B.S. Computer Engineering, Entrepreneurship Minor | Anticipated May 2025 | Iowa State University | 3.83 GPA
University Honors Program, Dean's List: F2021, S2022, F2022, S2023

EXPERIENCE

Co-founder, Chief Executive Officer | Casmium, LLC | West Des Moines, IA | February 2020 – Present
- **Youth Baseball Analytics Software-as-a-Service:** Combined entrepreneurial visions, software engineering, team management, and other fundamental operations to pursue an innovative business venture
- Managed software development sprints and issues to ensure a high-quality and reliable MVP
- Met with baseball coaches across Iowa to try our product and validate its effectiveness in their season

CYstarters Business Accelerator | ISU Pappajohn Center for Entrepreneurship | Ames, IA | May – July 2022
- Brought Casmium, LLC to CYstarters to gain entrepreneurial skills and grow our business
- Conducted customer discovery interviews to understand the sports analytics industry problem, current market solutions, and what our specific ideal customers are looking for in a solution
- Determined value proposition and go-to-market strategy based on coaches' testing feedback
- Gained helpful insight from mentors and learned valuable lessons to shape future processes and goals

XR (Extended Reality) Engineer Intern | Zirous, Inc. (VAEZR Studio) | West Des Moines, IA | May – August 2023
- Worked with a talented team of interns on 3D virtual reality (VR) experiences used by Zirous and other clients
- Solved engineering challenges involving head-mounted displays (HMDs) and 3D game development
- Designed visual experiences with the Unity 3D game engine and wrote game object functionality in C#
- Developed and presented to a client a re-creation of their manufacturing plant in a VR tour

SKILLS

Software Languages: JavaScript (React, React Native), HTML/CSS/Bootstrap, Java, C, Unity, C#, Python, Git, GNU Radio
Hardware Technologies: VHDL, Verilog, Intel Quartus Prime, QuestaSim (ModelSim), MIPS Assembly
Other Technologies: Figma, Google Cloud, GitHub, JetBrains, Adobe, Microsoft 365, Atlassian

ACHIEVEMENTS AND ACTIVITIES

Integration Team | CySat NASA CubeSat, Make to Innovate | Iowa State University | August 2022 – Present
- Collaborated with fellow engineers to build and launch a satellite into space with a 3-month scientific mission
- Developed software on its space-rated embedded systems to control satellite functions and mission tasks
- Developed communication protocols over AX.25 and Software-Defined Radios to establish a data link in space

Iowa State University Cyclone Football 'Varsity' Marching Band | August 2021 – Present
- Collaborated with fellow musicians to perform a marching routine with music and promote Cyclone spirit
- **Varsity Drumline Section Leader (Bass Drum):** Took leadership responsibilities to teach drumline fundamentals, manage logistics, and maintain a safe and fun environment for band members to thrive in
- Developed a well-rounded approach to problem-solving, utilizing fine arts and other aspects of the brain

Website Developer | Urbandale Community Theatre | Urbandale, IA | March – July 2023
- Designed and deployed a website and logos for a nonprofit to use for marketing and advertising their summer theatre production

Iowa State University College-by-College Pitch-off | 3rd Place Winner | March 2023
- Designed and presented a two-person, 90-second team pitch illustrating an innovative business idea
- Competed against other individuals or teams with unique business ideas in different colleges across Iowa State

Okoboji Entrepreneurial Institute, Okoboji, IA | Class of 2022 | June 2022
- Networked with Iowa entrepreneurship students and business owners in the Iowa Lakes region
- Pitched Casmium, LLC in the culminating pitch competition and won 1st place in the pre-revenue division
