OBJECTIVE

Obtain a computer engineering internship for summer 2023 to build upon self-attained skills and contribute impactful work towards the pursuit of a tech company.

EDUCATION

B.S. Computer Engineering • Anticipated May 2025 • Iowa State University • 3.71 GPA
University Honors Program

High School Diploma • May 2021 • Valley High School, WDM, IA • 4.23 Weighted/4.0 UW GPA
Top 15% of class, AP Scholar with Distinction (2 years), Extended Learning (Gifted/Talented) Program, Silver Cord Award (300+ Volunteer Hours), Concert, Jazz, and Marching Band, Hackathon Club

EXPERIENCE

Co-Founder, Web Developer (Self-Employed) • Casmium, LLC • Feb 2020 – Present • casmium.com

- Combined entrepreneurial visions with fundamental business operations to progress the mission of our company
- Utilized standard web development frameworks and tools to create a working SaaS
- Managed project backlogs, sprints, and issues to ensure productivity and on-time completion
- Gained helpful insight from mentors and learned valuable lessons by making mistakes to shape future processes and goals

Code Sensei (Teaching Assistant) • Code Ninjas Clive • July 2018 - August 2021

- Taught kids ages 7-14 how to create their own video games using various computer languages to expose kids to computer science, STEM, and problem-solving
- Learned early childhood and peer leadership through facilitating summer STEM camps and open houses for parents and kids
- Improved presentation and explanation skills through 1-on-1 or classroom instruction of concepts with kids

SKILLS

Programming Languages: JavaScript (React, React Native), HTML/CSS (Bootstrap), Java, Python, C

Other Technologies: Git, GitHub, Figma, Google Cloud Platform, JetBrains IDEs, Adobe Creative Cloud, MS Office

ACTIVITIES

Iowa State University Cyclone Football 'Varsity' Marching Band • August 2021 – Present

- Varsity Drumline – Collaborated with fellow musicians to perform a unified marching routine and musical pieces
- Developed skills in non-engineering areas to practice solving different types of problems and use multiple areas of the mind
- Gained social experiences that shape personal identity and uniqueness

Worship Team, Drums • Lutheran Church of Hope • December 2016 – Present

- Collaborated with fellow musicians to perform a contemporary worship set to lead the congregation in praise and contribute towards the mission of growing the church
- Volunteered during Wednesday nights for students and weekends for regular services

***FIRST* Robotics Competition • Team ICE 6419 • August 2017 - May 2021 • iowaice.org**

- Facilitated the programming of the embedded operations of a competition robot using Java with the WPI FRC Control System to bring the robot's components to life
- Utilized autonomous movement algorithms, object detection, and projectile launching to accomplish the goals of each season's unique competition game
- Managed the team website as a marketing tool to reach students wishing to be a part of a robotics team
